Aurora WMT5001 Diamond

Metallic Treasures Collection

Winfield Thybony is one of the largest manufacturers of Metallic Textured wallpapers. Originally conceived in 1953 by a San Francisco artist, the company's signature metallic wallpaper incorporates a hand applied surface texture over shimmery grounds to subtly reflect light. The opulence set a new standard for elegant living and was widely sought after.

Decades later the offering continues to evolve with a remarkable harmony. A perfect blend of modern and traditional, Winfield Thybony melds machine etched metal paper with the artistry of crushed stone to create an atmospheric pattern named Aurora. The layering of metallic paper, iridescent inks, and natural stone creates a luxurious oxidation effect. An array of 21 colors draws its inspiration from the natural occurrence of the Aurora Borealis. Within this color palette you can find traditional or contemporary colorways that will compliment any residential or commercial space, bringing elegance to your interiors.
